

GOR - 70

GSM Cell-phone repeater

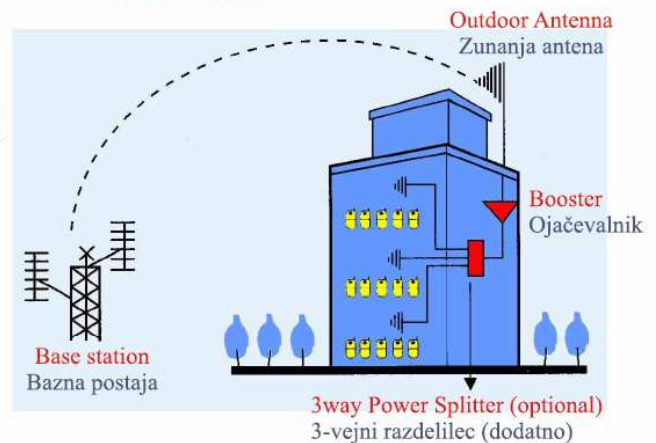

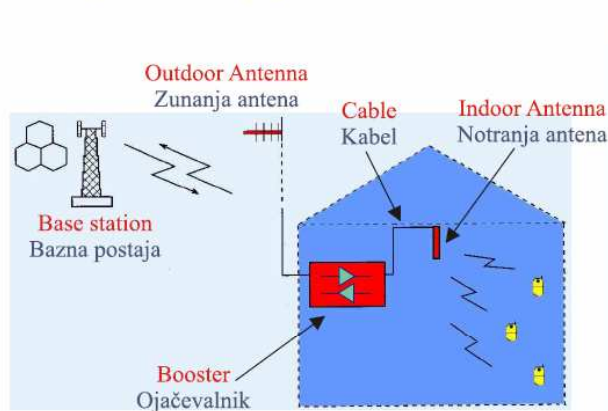

4 / 2007

GSM repetitor GOR-70 se uporablja na mestih, kjer je sprejem GSM signala zelo slab: v kletah, pritličjih, stavbah z veliko železo betona itd. Zaradi velikosti in oblike naprave je sistem zelo primeren za individualne hiše, pisarne, restavracije, hotele, vikende, trgovske centre, itd. Sistem ojača GSM signal (900 MHz) in ga brezžično razdeli po prostoru.

GSM repeater **GOR-70** is applied on the places, where the GSM signal is low: in the basements, ground floor, in the buildings with a lot of steel and concrete. Because the device is small, it is appropriate for private houses, offices, restaurants, hotels, shopping malls, etc. Booster amplifies the GSM signal (900 MHz) and distributes it around the place wireless.

- ✓ Pokrivanje notranjega prostora 600 m2.
- ✓ Oba vhoda sta prirejena za popolno dvosmerno ojačanje signala (full duplex)
- ✓ Visoka zanesljivost po standardu GB6993-86. Kompatibilnost baterije po standardu ETS300 609-4.

- ✓ 600 m2 indoor coverage.
- ✓ Adopt two ports full-duplex design.
- ✓ Good reliability, meet the standard od GB6993-86. The compatibility of battery meets the standard of ETS300 609-4.

Vsebina kompleta Kit Include:

Frekvenčni pas	Oddajni pas/ Up Link (UL): 890 - 915 MHz Sprejemni pas / Down Link (DL) : 935 - 960 MHz	Frequency Range
Izhodna moč	UL: 17 dBm DL: 17 dBm (3 rd > 40 dB)	Output Power
Ojačanje	UL: 60 dB DL: 70 dB	Gain
Valovitost ojačanega frek. področja	3 dB	Pass Band Ripple
Skupinska zakasnitev	1.5 ns	Group Delay
Bočno oddajanje izven frek.pasa	<= - 40 dBm	Spurious Emission Out of Band
Impedanca	50 Ohm	Impedance
Napajanje	izmenična AC 230V, 50 Hz	Power Supply
Pokrivanje	600 m2	Covering
